

“Star” Engineering Masters Student Required

We are a manufacturer based in Auckland, Wellington and Christchurch who are working closely with the Waikato University’s Engineering Department.

We are working with a variety of horticultural sectors to assess damage to fruit caused by harvest bins, manufactured from various materials. The objective of the project will be to apply your engineering principles to identify where damage is occurring and why. The knowledge gained will be applied in developing plastic harvest bins, which can be manufactured locally.

We are looking for a student with a passion for research and problem solving who will be eligible to do a Masters of Engineering degree. It is expected you will hold a Bachelors degree in Chemical or Mechanical Engineering and have an interest in the NZ horticultural industry as well as plastic materials.

A generous scholarship is offered and you will have exceptional mentors at the University of Waikato as well as industry partners that will assist in every possible way.

Applications close at 4pm on Friday 27th March 2009

If you would like to be apart of this exciting project, please apply by sending your CV and covering letter to natalie_hilterman@viscount.com.au
